

**Press Release**  
Spring 2015

## Fluted Contrast in new spring hues

The Contrast cup is a popular and permanent member of the Royal Copenhagen family, and to the delight of loyal fans, the series is expanded each season with new colours that match the latest trends. Naturally, this spring is no exception as Royal Copenhagen welcomes two trendy new colours to the Contrast family: *Mint* and *Bubble Gum*. These hues are the essence of summer, with their sweet candy colours also underpinning the many different ways the cups can be used. Made from pure white porcelain and colourful silicone, the Contrast cups are ideal for everything from hot beverages to water, milk and juice as well as for serving snacks, chocolate and sweets. The bright and cheery colours match the tasteful new colours of spring, making the Contrast cups a particularly appetising element of any table setting.

The Contrast cup's popularity and multifunctionality is not only true of the classic 33 cl cup in the series. Its sister design, the Contrast espresso cup, also comes in a varied palette of colours and uses, and in 2015, two mellow new colours will be added to the mix, *Heather* and *Opal*. Poetic and with an air of Southern France, these new additions are perfect for enjoying a piping hot espresso on the terrace on a warm summer day. The decorative miniature cups are also useful for everything from toothpicks to sugar, salt to little treats.

The Contrast cup (33 cl) in the colours Mint and Bubble Gum has a recommended retail price of EUR 149.

The Contrast espresso cup (8 cl) in the colours Heather and Opal has a recommended retail price of EUR 99.
